A Breath or Two

for chamber orchestra
(2024)

A Breath or Two is a short work for chamber orchestra, whose conception is owed to the ebb and flow of breath, and its power to instill calmness and clarity. The form of the piece illustrates two deepening breaths, followed by a stillness which gradually lulls and swells into a dense and powerful cacophony, quickly extinguished to expose an enduring clarity in the closing moments.

Taking much inspiration from impressionist compositions of Ravel, the opening begins with a shimmering string texture, employing the natural harmonics of the instruments to create an airy and atmospheric timbre. Woodwind instruments gradually enter as the harmony begins to expand outwards from the clear major triads of the opening. Growing through additive harmonic processes focussed on extending chords outwards using alternating thirds, the harmonies become increasingly rich alongside the texture before dissipating quickly, as a deep exhale.

The second breath is increasingly dramatic and less atmospheric than the opening. Here, scurrying ascending scale motifs define the build as the timbre becomes richer with the entry of trumpets, the trombone and percussion. As more rhythmic figures become prominent, so do the harmonies become tense and increasingly dissonant. Following some movement between whole tone scales they eventually blend together creating a climactic moment with the full orchestra and full range of pitches creating a powerful climax, punctuated by off beat jabs which stun intensity into retreating.

Following the cathartic exhale of this moment we reach a comparative stillness. With a focus on Ds the instruments pass sounds between them in a Penderecki-style lulling. From here the additive harmonic processes return, and the timbre gently, almost imperceptibly at time expands with instruments entering from behind one another. This final inflation represents an acknowledgement of a mindful clarity brought on by a deep breath, and in a final retreat we are left with a still, sustained interval of a tone, which endures, before fading to the distance.
